Quality inspected

“Every instrument that leaves our workshop carries our name and our promise — that it was made to perform, and made to last.”

— Shaban Arif, Founder & CEO

WHY PARTNERS CHOOSE WELKIN

German-grade stainless steel

Forged from premium AISI 410/420 surgical stainless and titanium, with corrosion-resistant passivation for a lifetime of autoclaving.

Hand-finished precision

Every jaw, ratchet, and cutting edge is set and tested by master craftsmen, then matched against original-pattern tolerances.

OEM & private label

We manufacture to your specification, laser-mark your brand, and package to your market's regulatory requirements.

Reliable global logistics

Consolidated export documentation and dependable lead times keep distributors and hospitals stocked on schedule.

Quality you can stake a life on.

From raw steel to final inspection, every Welkin instrument is built and checked against stringent international standards — premium materials, hand-finishing, and 100% functional inspection.

- ISO 13485
- ISO 9001
- CE Conformity
- FDA Registration Support

01

Forging

Premium surgical stainless drop-forged for strength and grain integrity.

02

Machining

CNC tooling shapes jaws, joints, and serrations to original-pattern tolerances.

03

Hand assembly

Master craftsmen set boxes, ratchets, and joints for precise function.

04

Passivation

Polishing and chemical passivation for corrosion resistance through autoclaving.

05

Inspection

Every instrument checked for function, finish, and dimensions before packing.

06

Export

Consolidated documentation and reliable logistics to 40+ export markets.

CATALOGUE OVERVIEW

Complete instrument ranges

Surgical Instruments	66
Dental Instruments	12
Single-Use Instruments	15
Ophthalmic Instruments	36
Holloware Instruments	21

150 instruments listed in this catalogue. Custom patterns, OEM programmes, and private-label manufacturing available on request.

Best-selling patterns & flagship ranges.

A selection of our most requested instruments across surgical, dental, ophthalmic, and single-use lines — representative of the craftsmanship in every Welkin pattern.

Bone Holding Forceps

ORTHOPEDIC

120 · 150 · 170 · 210 mm

Kern bone holding forceps available with and without ratchet, for secure fixation of bone fragments during re...

Bone Cutting Forceps

ORTHOPEDIC

170 mm

McIndoe bone cutting forceps, compound action, angled with a 20 mm blade for clean, controlled resection.

Dressing Forceps

GENERAL SURGERY

125 mm

French-pattern dressing forceps with serrated jaws for atraumatic handling of dressings and tissue.

Poole Suction Tube

GENERAL SURGERY

240 · 300 · 330 · 360 mm

Poole suction tube, 10 mm wide with 2 mm fenestrations for efficient, atraumatic fluid evacuation.

Adson Bipolar Forceps

ELECTROSURGERY / NEURO

120 mm

Adson bipolar forceps with 1 mm tip and twin 4 mm pin cable for precise coagulation in delicate fields.

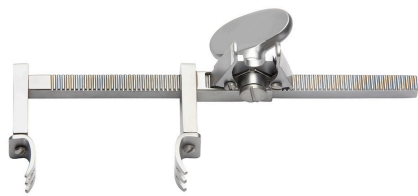

Tungsten Carbide Forceps

MICRO-SURGERY

180 mm

Tungsten-carbide insert forceps for superior grip and extended edge life in fine work.

Bailey Rib Spreader

THORACIC

Self-retaining Bailey rib spreader for stable chest wall retraction during open thoracic surgery.

DeBakey Dissecting Forceps

CARDIOVASCULAR

Atraumatic DeBakey dissecting forceps with longitudinal serrations for delicate vascular and tissue handling.

Finochietto Rib Spreader

THORACIC

Classic Finochietto rib spreader with rack-and-pinion action for reliable thoracic cavity exposure.

Lebsche Sternum Chisel

THORACIC

Lebsche sternum chisel for controlled sternal splitting and bone work during median sternotomy.

Sellers Rib Spreader

THORACIC

Sellers rib spreader for self-retaining retraction of the rib cage during open chest procedures.

Bowel Clamp

COLO-RECTAL

General bowel clamp for atraumatic occlusion of intestinal segments during resection and anastomosis.

Cardio-thoracic, colo-rectal, orthopedic & general surgery.

Specialist ranges including cardio vascular thoracic, colo-rectal and intestinal, plus general surgical forceps, retractors and scissors for every discipline.

66 instruments in this range

Cardio Vascular Thoracic Instruments

32 products

Allison Lung Retractor

THORACIC

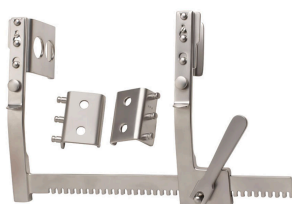

Allison lung retractor for gentle retraction and exposure of lung tissue during thoracic procedures.

Bailey Rib Spreader

THORACIC

Self-retaining Bailey rib spreader for stable chest wall retraction during open thoracic surgery.

Burford Finochietto Rib Spreader

THORACIC

Burford-pattern Finochietto rib spreader with ratchet mechanism for controlled sternotomy and thoracotomy exposure.

DeBakey Dissecting Forceps

CARDIOVASCULAR

Atraumatic DeBakey dissecting forceps with longitudinal serrations for delicate vascular and tissue handling.

Doyen Rib Raspatory

THORACIC

Doyen rib raspatory for periosteal elevation and clean rib preparation during thoracic access.

Finochietto Rib Spreader

THORACIC

Classic Finochietto rib spreader with rack-and-pinion action for reliable thoracic cavity exposure.

Gluck Rib Shear

THORACIC

Gluck rib shears for controlled rib resection with clean, predictable cutting action.

Harrington Retractor

THORACIC

Harrington retractor for deep soft-tissue and organ retraction in thoracic and abdominal fields.

Jacobson Scissors

MICRO / CARDIOVASCULAR

Fine Jacobson micro scissors for precise dissection in microvascular and delicate thoracic work.

Lebsche Sternum Chisel

THORACIC

Lebsche sternum chisel for controlled sternal splitting and bone work during median sternotomy.

Lees Bronchus Clamp

THORACIC

Lees bronchus clamp for secure occlusion and manipulation of bronchial tissue during lung surgery.

Liston Key Rib Shear

THORACIC

Liston key-pattern rib shears for efficient rib cutting with minimal splintering.

Micro Dressing Forceps

MICRO / CARDIOVASCULAR

Micro dressing forceps for fine tissue handling, suture placement, and delicate thoracic dissection.

Micro Ring Forceps

MICRO / CARDIOVASCULAR

Micro ring forceps with fenestrated tips for atraumatic grasping in microvascular procedures.

Nelson Lobectomy Scissors

THORACIC

Nelson lobectomy scissors designed for precise parenchymal division during pulmonary resection.

Phlebectomy Hook

VASCULAR

Phlebectomy hook for varicose vein extraction and superficial venous procedures.

Potts-Smith Forceps

THORACIC

Potts-Smith forceps combining angled and straight patterns for versatile thoracic tissue handling.

Price Thomas Bronchus Clamp

THORACIC

Price Thomas bronchus clamp for occlusion and traction of bronchial structures during lobectomy.

Sellors Costotome (Child)

THORACIC

Sellors costotome in child size for controlled rib osteotomy during paediatric thoracic access.

Sellors Rib Approximator with Swivel Blades

THORACIC

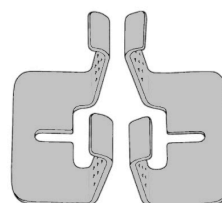

Sellors rib approximator with swivel blades for alignment and fixation of rib segments after thoracotomy.

Sellors Rib Spreader

THORACIC

Sellors rib spreader for self-retaining retraction of the rib cage during open chest procedures.

Sellors Rib Spreader — Harefield Scapula Blade

SPARE PARTS

Replacement Harefield scapula blade for Sellors rib spreader systems.

Sellors Rib Spreader — Harefield Sternal Blade

SPARE PARTS

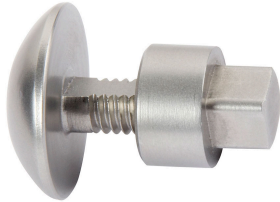

Replacement Harefield sternal blade for Sellors rib spreader systems.

Sellors Rib Spreader — Key Only

SPARE PARTS

Replacement spreader key for Sellors rib spreader assemblies.

Sellors Rib Spreader — Nut & Bolt

SPARE PARTS

Replacement nut and bolt set for Sellors rib spreader maintenance.

Sellors Rib Spreader — Single Blade

SPARE PARTS

Replacement single blade for Sellors rib spreader systems.

Semb Ligature Passing Forceps

CARDIOVASCULAR

Semb ligature passing forceps for threading sutures around vessels and deep thoracic structures.

Semb Rib Raspatory

THORACIC

Semb rib raspatory for periosteal stripping and rib bed preparation in thoracic surgery.

Tudor Edwards Elevator

THORACIC

Tudor Edwards elevator for blunt dissection and periosteal elevation in thoracic access.

Tudor Edwards Rib Shear

THORACIC

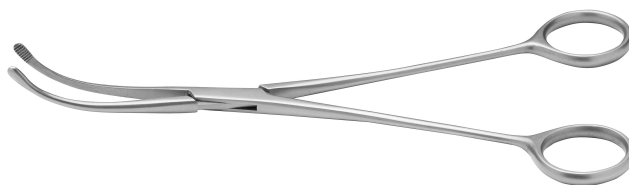

Tudor Edwards rib shears for clean rib division during thoracotomy and chest wall procedures.

Tudor Edwards Scapula Retractor

THORACIC

Tudor Edwards scapula retractor for posterior thoracic exposure and scapular retraction.

Waterston Dissecting Forceps

CARDIOVASCULAR

Waterston dissecting forceps for fine tissue dissection in paediatric and cardiovascular surgery.

Cardio-thoracic, colo-rectal, orthopedic & general surgery.

Specialist ranges including cardio vascular thoracic, colo-rectal and intestinal, plus general surgical forceps, retractors and scissors for every discipline.

66 instruments in this range

Colo Rectal & Intestinal Instruments

21 products

Bowel Clamp

COLO-RECTAL

General bowel clamp for atraumatic occlusion of intestinal segments during resection and anastomosis.

Chevalier Jackson Biopsy Forceps

COLO-RECTAL

Chevalier Jackson biopsy forceps for endoscopic and open tissue sampling of rectal and colonic lesions.

Dickens Bowel Clamp

COLO-RECTAL

Dickens bowel clamp for secure, atraumatic grasp of bowel during intestinal surgery.

Doyen Clamp

COLO-RECTAL

Doyen intestinal clamp for non-crushing occlusion of bowel lumen during resection procedures.

Finch Excision Clamp

COLO-RECTAL

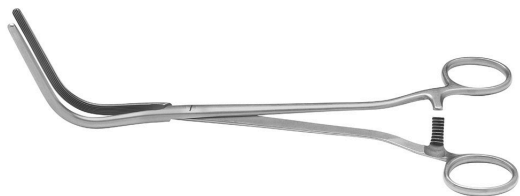

Finch excision clamp for controlled tissue excision margins in colorectal surgery.

Hayes Clamp

COLO-RECTAL

Hayes clamp for bowel and mesenteric tissue handling during intestinal procedures.

Houghton Excision Clamp

COLO-RECTAL

Houghton excision clamp designed for precise margin control in colorectal resections.

Kocher Clamp

COLO-RECTAL

Kocher clamp with curved jaws for firm tissue grasp during bowel and mesenteric dissection.

Lloyd Davis Rectal Biopsy Forceps

COLO-RECTAL

Lloyd Davis rectal biopsy forceps for accurate tissue sampling in rectal examination and surgery.

Lloyd Davis Rectal Clamp

COLO-RECTAL

Lloyd Davis rectal clamp for controlled rectal tissue handling during low anterior resection.

Low Resection Rectal Stump Clamp

COLO-RECTAL

Low resection rectal stump clamp for secure occlusion of the rectal stump during anastomosis.

Officers Biopsy Forceps

COLO-RECTAL

Officers biopsy forceps for endoscopic and open biopsy of colonic and rectal tissue.

Overholt Artery Forceps

COLO-RECTAL

Overholt artery forceps for mesenteric vessel ligation and fine tissue dissection in bowel surgery.

Parker Kerr Clamp

COLO-RECTAL

Parker Kerr clamp for crushing occlusion of bowel ends during resection and anastomosis.

Patterson Biopsy Forceps

COLO-RECTAL

Patterson biopsy forceps for tissue sampling in colorectal diagnostic and operative procedures.

Payr Clamp

COLO-RECTAL

Payr intestinal clamp for crushing occlusion of bowel during resection and anastomosis.

Resano Bowel Clamp

COLO-RECTAL

Resano bowel clamp for atraumatic intestinal occlusion during colorectal surgery.

Schoemaker Colectomy Clamp

COLO-RECTAL

Schoemaker colectomy clamp for secure bowel division and margin control during colectomy.

Seedhouse Clamp

COLO-RECTAL

Seedhouse clamp for bowel and mesenteric tissue handling in intestinal surgery.

Seton Pringle Clamp

COLO-RECTAL

Seton Pringle clamp for vascular occlusion and tissue control in abdominal and colorectal procedures.

Yeoman Biopsy Punch

COLO-RECTAL

Yeoman biopsy punch for cylindrical tissue sampling in rectal and perianal examination.

Cardio-thoracic, colo-rectal, orthopedic & general surgery.

Specialist ranges including cardio vascular thoracic, colo-rectal and intestinal, plus general surgical forceps, retractors and scissors for every discipline.

66 instruments in this range

General & Orthopedic Instruments

13 products

Bone Holding Forceps

ORTHOPEDIC

120 · 150 · 170 · 210 mm

Kern bone holding forceps available with and without ratchet, for secure fixation of bone fragments during re...

Bone Cutting Forceps

ORTHOPEDIC

170 mm

McIndoe bone cutting forceps, compound action, angled with a 20 mm blade for clean, controlled resection.

Dressing Forceps

GENERAL SURGERY

125 mm

French-pattern dressing forceps with serrated jaws for atraumatic handling of dressings and tissue.

Poole Suction Tube

GENERAL SURGERY

240 · 300 · 330 · 360 mm

Poole suction tube, 10 mm wide with 2 mm fenestrations for efficient, atraumatic fluid evacuation.

Adson Bipolar Forceps

ELECTROSURGERY / NEURO

120 mm

Adson bipolar forceps with 1 mm tip and twin 4 mm pin cable for precise coagulation in delicate fields.

Lucae Mallet

ORTHOPEDIC / ENT

200 mm

Solid stainless Lucae mallet, 8 oz (227 g), balanced for accurate, repeatable impact.

Biopsy Forceps

DIAGNOSTICS

350 mm

Long biopsy forceps for accurate tissue sampling through narrow access routes.

Lachrymal Probe

OPHTHALMIC

0.9 – 1.6 mm

Double-ended lachrymal probe for gentle exploration and dilation of the lacrimal canaliculi.

Joseph Saw

ENT / RHINOPLASTY

30 mm blade

Joseph nasal saw for controlled bone work in rhinoplasty and ENT procedures.

Tungsten Carbide Forceps

MICRO-SURGERY

180 mm

Tungsten-carbide insert forceps for superior grip and extended edge life in fine work.

Surgical Retractor

GENERAL SURGERY

130 mm

Self-retaining retractor providing clear, stable exposure of the operative field.

Speculum

EXAMINATION

105 · 120 · 130 mm

Polished speculum with smooth blades for comfortable, clear examination.

Insufflation Cannula

LAPAROSCOPY

355 mm

Insufflation cannula for controlled establishment of pneumoperitoneum in minimally-invasive surgery.

Extraction, restorative & diagnostic instruments.

Precision dental forceps, elevators, scalers, mirrors and explorers engineered for clinical durability and patient comfort.

12 instruments in this range

Bone Rongeurs

ORAL SURGERY

Precision bone rongeurs for controlled trimming and removal of bone during dental and maxillofacial procedure...

Cement Spatulas

RESTORATIVE

Stainless steel cement spatulas for accurate mixing and placement of dental cements and restorative materials.

Crown Beebee Scissors

RESTORATIVE

Fine crown and bridge scissors for trimming matrix bands, retraction cord, and delicate restorative work.

Dental Cartridge Syringe

ANAESTHESIA

Cartridge-type dental syringe for controlled delivery of local anaesthetic during clinical procedures.

Mouth Mirror Handle

DIAGNOSTICS

Ergonomic mouth mirror handle compatible with standard mirror heads for intra-oral examination.

Stainless Steel Impression Trays

PROSTHETICS

Perforated stainless steel impression trays for accurate alginate and elastomer impressions.

Explorers & Endodontic Instruments

ENDODONTICS

Explorers and endodontic instruments for caries detection, canal exploration, and root canal therapy.

Plier for Orthodontics & Prosthetics

ORTHODONTICS

Specialist pliers for wire bending, bracket placement, and adjustments in orthodontic and prosthetic work.

Tooth Extracting Forceps for Children

PAEDIATRIC DENTISTRY

Smaller-pattern extraction forceps designed for atraumatic removal of deciduous and paediatric teeth.

Wisdom Teeth Extracting Forceps

ORAL SURGERY

Heavy-duty forceps engineered for secure grip and controlled extraction of third molars and impacted teeth.

Extracting Forceps

ORAL SURGERY

A full range of anatomically contoured extraction forceps for upper and lower teeth across all quadrants.

Root Elevators

ORAL SURGERY

Root elevators and luxators for atraumatic tooth elevation, luxation, and root fragment removal.

Sterile, ready-to-use disposables for every specialty.

Pre-sterilised single-use forceps, scissors, specula, needle holders and specialty instruments — eliminating reprocessing costs and cross-contamination risk.

15 instruments in this range

Halsted-Mosquito Artery Forceps — Straight, 125 mm

STERILE / GENERAL

125 mm · straight · sterile

Single-use, sterile Halsted-Mosquito artery forceps, straight pattern, 125 mm — for precise haemostasis in mi...

Halsted-Mosquito Artery Forceps — Curved, 125 mm

STERILE / GENERAL

125 mm · curved · sterile

Single-use, sterile Halsted-Mosquito artery forceps, curved pattern, 125 mm — ideal for deep-field vessel cla...

Pean Artery Forceps — Straight, 140 mm

STERILE / GENERAL

140 mm · straight · sterile

Single-use, sterile Pean artery forceps, straight, 140 mm — robust crushing clamp for medium-calibre vessels...

Halsted-Mosquito Forceps

STERILE / GENERAL

Sterile single-use Halsted-Mosquito forceps for fine haemostatic control in general and specialist surgery.

Kocher Hemostatic Forceps

STERILE / GENERAL

Sterile single-use Kocher hemostatic forceps with interlocking teeth for secure grasp of tissue and vessels.

Dressing Forceps

STERILE / GENERAL

Sterile single-use dressing forceps for atraumatic handling of gauze, dressings, and soft tissue.

Operating Scissors

STERILE / GENERAL

Sterile single-use operating scissors for clean, controlled cutting of tissue and suture material.

Lister Bandage Scissors

STERILE / GENERAL

Sterile single-use Lister bandage scissors with angled, blunt-tip lower blade for safe dressing removal.

Mayo-Hegar Needle Holder

STERILE / SUTURING

Sterile single-use Mayo-Hegar needle holder for secure needle grip and precise suture placement.

Knife Handle No. 3

STERILE / GENERAL

No. 3

Sterile single-use scalpel knife handle No. 3, compatible with standard surgical blades.

Senn-Müller Retractor

STERILE / GENERAL

Sterile single-use Senn-Müller retractor for shallow wound and soft-tissue retraction.

Killian Nasal Speculum

STERILE / ENT

Sterile single-use Killian nasal speculum for clear visualisation of the nasal cavity and septum.

Cusco Vaginal Speculum

STERILE / GYNAECOLOGY

Sterile single-use Cusco vaginal speculum for examination and minor gynaecological procedures.

Miller Laryngoscope Set

STERILE / ANAESTHESIA

Sterile single-use Miller laryngoscope set for airway visualisation and intubation.

Liposuction Cannula

STERILE / AESTHETIC

Sterile single-use liposuction cannula for controlled fat aspiration in aesthetic and reconstructive surgery.

Cataract, strabismus, lacrimal & micro-surgical eye instruments.

Precision ophthalmic scissors, forceps, specula, capsulorhexis instruments and chalazion curettes — engineered for micro-surgical accuracy.

36 instruments in this range

Utrata Capsulorhexis Forcep

CATARACT

Utrata capsulorhexis forceps for controlled initiation and completion of the anterior capsule tear in phacoem...

Nichamin Double-Ended Nucleus Chopper & Spatula

CATARACT

Double-ended Nichamin nucleus chopper and spatula for efficient nucleus division and anterior chamber manipul...

Knolle Lens Nucleus Spatula & Anterior Chamber Gauge

CATARACT

Knolle lens nucleus spatula with integrated anterior chamber depth gauge for safe cataract surgery.

Kuglen Hook

CATARACT

Kuglen hook for capsular bag manipulation, iris retraction, and IOL positioning during cataract surgery.

Air Injection Cannula

CATARACT

Air injection cannula for controlled delivery of air into the anterior chamber during ophthalmic procedures.

Kelman-McPherson Tying Forceps

MICRO-OPHTHALMIC

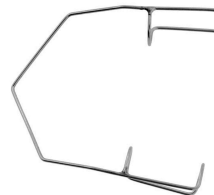

Angled Kelman-McPherson tying forceps for precise suture handling and knot placement in micro-ophthalmic surg...

Troutman (Colibri) Iris Forceps

CATARACT

Troutman Colibri iris forceps for atraumatic iris grasp and manipulation during anterior segment surgery.

Barraquer (Colibri) Eye Speculum

SPECULA

Barraquer Colibri wire speculum for gentle, self-retaining lid retraction during ophthalmic surgery.

Lieberman Eye Speculum

SPECULA

Lieberman eye speculum for secure, adjustable lid retraction with wide surgical field exposure.

Lieberman Eye Speculum — K-Wire (Kratz)

SPECULA

Lieberman eye speculum with K-wire (Kratz) attachment for enhanced stability during lengthy procedures.

Desmarre Retractor

RETRACTORS

130 mm

Desmarre lid retractor for broad, atraumatic exposure of the globe and adnexal tissues.

Iris Scissors

SCISSORS

90 · 110 · 115 mm

Fine iris scissors for delicate cutting of iris, capsule, and conjunctival tissue.

Conjunctival Scissors

SCISSORS

110 mm

Conjunctival scissors with blunt/pointed blades for precise conjunctival dissection and trimming.

Enucleation Scissors

SCISSORS

90 · 110 mm

Enucleation scissors for controlled cutting during eye removal and orbital procedures.

Jameson's Tenotomy Scissors

SCISSORS

140 mm

Jameson's tenotomy scissors with sharp pointed blades for muscle and tendon division in strabismus surgery.

Knapp Scissors

SCISSORS

110 mm

Knapp scissors with black-coated handles for reduced glare during microsurgical cutting.

Stevens Tenotomy Scissors

SCISSORS

110 mm

Stevens tenotomy scissors for fine cutting in strabismus, lid, and conjunctival procedures.

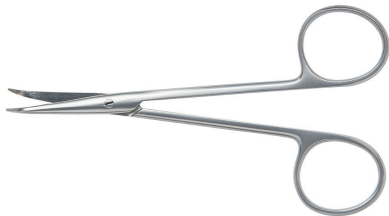

Strabismus Scissors

SCISSORS

90 · 110 · 130 mm

Strabismus scissors with blunt/pointed blades for muscle recession and conjunctival work.

Werbs Ophthalmic Scissors

SCISSORS

115 mm

Werbs ophthalmic scissors for general microsurgical cutting in anterior and posterior segment work.

Vannas Iridectomy Scissors

SCISSORS

Vannas iridectomy scissors for precise iridectomy and fine intraocular tissue excision.

Iris Scissors — Hard Edge

SCISSORS · HARD EDGE

110 mm

Hard-edge iris scissors for crisp, clean cuts through dense iris and capsular tissues.

Stevens Tenotomy Scissors — Hard Edge

SCISSORS · HARD EDGE

110 mm

Hard-edge Stevens tenotomy scissors for enhanced cutting performance on tough tissue.

welkinsurgical.com

Strabismus Scissors — Hard Edge

SCISSORS · HARD EDGE

90 · 110 mm

Hard-edge strabismus scissors for reliable cutting in extraocular muscle surgery.

Iris Scissors — Surecut

SCISSORS · SURECUT

90 · 110 mm

Surecut iris scissors with micro-serrated blades for secure tissue grip while cutting.

Strabismus Scissors — Surecut

SCISSORS · SURECUT

90 · 110 mm

Surecut strabismus scissors combining serrated grip with clean cutting action.

Castroviejo Caliper

MEASURING

Castroviejo caliper for accurate measurement of corneal diameter, iridectomy size, and implant dimensions.

Liebrich Lacrimal Probe

LACRIMAL

Liebrich malleable lacrimal probe for gentle exploration and dilation of the lacrimal canaliculi.

Wilder Lacrimal Dilator

LACRIMAL

Wilder lacrimal dilator for progressive dilation of the punctum and canaliculus.

Heath Chalazion Curette

OCULOPLASTICS

Heath chalazion curette for complete evacuation of chalazion contents through a small incision.

Meyhoefer Chalazion Curette

OCULOPLASTICS

Meyhoefer chalazion curette in multiple sizes for effective chalazion removal.

Littlewood Grasping Forceps

FORCEPS

Littlewood grasping forceps for secure tissue hold during lid and conjunctival procedures.

Schroeder Tenaculum Forceps

FORCEPS

Schroeder tenaculum forceps for firm grasp of conjunctiva, muscle, or capsule during surgery.

St. Clair-Thompson Forceps

FORCEPS

St. Clair-Thompson forceps for delicate tissue grasp in lacrimal and lid surgery.

Rampley Swab Forceps

FORCEPS

Rampley swab holding forceps for atraumatic sponge and gauze manipulation in the surgical field.

Polyp Forceps — Angled Shanks

FORCEPS

Angled-shank polyp forceps for tissue sampling and removal in narrow surgical access.

Fletcher-Van Doran Polyp Forceps

FORCEPS

Fletcher-Van Doran polyp forceps for secure grasp and removal of polypoid tissue.

Autoclavable trays, drums, bowls & patient-care utensils.

Hospital-grade stainless holloware — kidney trays, instrument trays, dressing drums, sterilisation boxes, gallipots, urinals, and ward equipment built for daily autoclaving.

21 instruments in this range

Kidney Tray (Deep)

PROCEDURE TRAYS

6", 8", 10", 12"

Deep-profile kidney-shaped emesis basin for collecting dressings, fluids, and small instruments at the bedside...

Kidney Tray (Shallow)

PROCEDURE TRAYS

8", 10" shallow

Shallow kidney dish for wound irrigation, minor procedures, and instrument transfer. Lightweight with even wa...

Instrument Tray

STERILE TRANSFER

8×6", 10×8", 12×10", 15×12", 18×12"

Flat rectangular stainless tray for organising and transporting surgical instruments between prep areas and t...

Instrument Tray with Cover

STERILE TRANSFER

10×8", 12×10", 15×12"

Matching tray and cover set for protected instrument carriage and short-term covered storage between procedur...

Dressing Drum (Jointed)

STERILISATION

6×6", 8×8", 9×5", 11×5", 11×9", 12×10", 14×9", 15×12"

Cylindrical dressing drum with jointed construction and perforated lid for steam penetration. Used in OT for...

Dressing Drum (Seamless)

STERILISATION

8×8", 11×5", 11×9", 12×10"

Seamless cylindrical drum with clip-lock lid — easier to clean, with no internal joints to trap residue. Suit...

Instrument Sterilisation Box

STERILISATION

8×6×2", 10×8×2", 12×10×3", 15×12×3"

Perforated instrument box with lid for autoclaving surgical sets. Ventilated design allows full steam circula...

Dressing / Lotion Bowl

GENERAL HOLLOWARE

4", 5", 6", 8", 10", 12" diameter

Round hemispherical bowl for antiseptic solutions, lotions, and prep fluids. Non-reactive mirror finish with...

Gallipot

GENERAL HOLLOWARE

2 oz, 4 oz, 6 oz

Small lipped pot for medicaments, antiseptic, or suture materials at the procedure table. Stackable with smoo...

Wash Basin

PATIENT CARE

8", 10", 12", 14" diameter

General-purpose stainless basin for bed bathing, sponge procedures, and clinical washing. Wide rim for secure...

Cheattle Forceps Jar

STERILE TRANSFER

Standard / large

Sterile forceps container with perforated inner basket — keeps Cheattle or dissecting forceps immersed in anti...

Male Urinal

PATIENT CARE

Standard adult

Contoured male urinal with spill-resistant lip and flat base for stable bedside use. Smooth interior for easy...

Female Urinal

PATIENT CARE

Standard adult

Anatomically shaped female urinal for immobile or post-operative patients. Autoclavable with polished interior.

Bed Pan

PATIENT CARE

Adult standard / fracture pan

Stainless bed pan with smooth rolled edges for patient comfort. Suitable for long-stay wards, home care, and welkinsurgical.com

Enema / Douche Can

PATIENT CARE

1 L / 2 L

Graduated enema can with hook suspension and tube outlet. Used for rectal irrigation and douche procedures in...

Spitting Mug / Sputum Pot

WARD EQUIPMENT

Standard ward

Lidded sputum pot for respiratory wards and TB clinics. Removable inner container option available on request.

Catheter Tray

PROCEDURE TRAYS

Standard set tray

Kidney-shaped catheterisation tray with compartments for catheter, syringe, and antiseptic — keeps sterile fi...

Dressing Tray

PROCEDURE TRAYS

12×10", 15×12"

Flat dressing tray for wound care, suture removal, and minor procedures. Available plain or with fitted instr...

Measuring Jug

GENERAL HOLLOWWARE

200 mL, 500 mL, 1000 mL

Graduated measuring jug for oral fluids, irrigation, and medication preparation. Clear internal markings with...

Thermometer Jar

WARD EQUIPMENT

Standard ward

Tall cylindrical jar for storing clinical thermometers in antiseptic solution at nursing stations.

Feeding Cup

PATIENT CARE

200 mL / 300 mL

Handled feeding cup with spout for patients who cannot use standard cups. Smooth tip and balanced handle for 2026

Grow with a manufacturing partner you can trust.

Welkin Surgical supports distributors, hospital procurement teams, and brand owners with flexible supply programmes — from catalogue orders to fully custom OEM and private-label manufacturing.

Distributor programme

Access our full catalogue of 500+ patterns with competitive export pricing, consolidated shipping documentation, and dependable lead times for recurring stock orders.

OEM manufacturing

We manufacture to your drawings and specifications — from prototype sampling through volume production, with laser marking, custom packaging, and regulatory documentation support.

Private label

Launch or extend your instrument brand with Welkin craftsmanship behind it. We handle production, QC, and export while you focus on market development and customer relationships.

HOW TO WORK WITH US

1. **Enquire** — Share your product list, reference samples, or technical drawings via email or our website contact form.
2. **Sample & quote** — We confirm specifications, provide samples where required, and issue a formal quotation with lead times.
3. **Production** — Orders enter our forge-to-finish workflow with full in-process and final inspection.
4. **Delivery** — Instruments are laser-marked, packaged to your requirements, and shipped with complete export documentation.

Request a quotation

Whether you need a single instrument pattern or a complete catalogue supply programme, our team is ready to assist.

Pricing is available on request. Minimum order quantities vary by product line.
